

20. A method, comprising the acts of:
providing a rack-mounting assembly comprising a clip and a fastener
engageable with a first shaped mounting aperture of a rack; and
providing a fastener-to-aperture adapter engageable with a second shaped
mounting aperture of the rack.

21. The method of claim 20, wherein providing the rack-mounting assembly comprises forming a U-shaped clip having a pair of members biased toward one another.

22. The method of claim 20, wherein providing the rack-mounting assembly comprises positioning the fastener at least partially within the clip.

23. The method of claim 20, wherein providing the fastener-to-aperture adapter comprises jacketing the fastener at least partially with the fastener-to-aperture adapter.

24. The method of claim 20, wherein providing the rack-mount assembly comprises providing an internally threaded boss member of the fastener at least partially within a resilient U-shaped structure of the clip.

25. The method of claim 20, comprising providing a rack-mountable device that is selectively mountable into a first rack without the fastener-to-aperture
